The Fourier transform has become a powerful tool in diverse fields of sci ence. In some cases, the Fourier trans form can provide a means of solving unwieldy equations that describe dy namic responses to electriciCity, heat or light. In other cases, it can identify the regular contributions to a fluctuating RONAI D. BRACEWELI.

This paper analyses Fourier transform used for spectral analysis of periodical signals and emphasizes some of its properties. It is demonstrated that the spectrum is strongly depended of signal duration that is very important for very short signals which have a very rich spectrum, even for totally harmonic signals. Surprisingly is taken the conclusion that spectral function of harmonic signals ...
